

# Planet Guide

annouimetmusic.com

The orbits of the planets in our solar system. The Sun is at the center and the nine planets are orbiting around the Sun.

- |               |            |               |            |
|---------------|------------|---------------|------------|
| Inner planets | 1. Mercury | Outer planets | 5. Jupiter |
|               | 2. Venus   |               | 6. Saturn  |
|               | 3. Earth   |               | 7. Uranus  |
|               | 4. Mars    |               | 8. Neptune |
|               |            |               | 9. Pluto   |

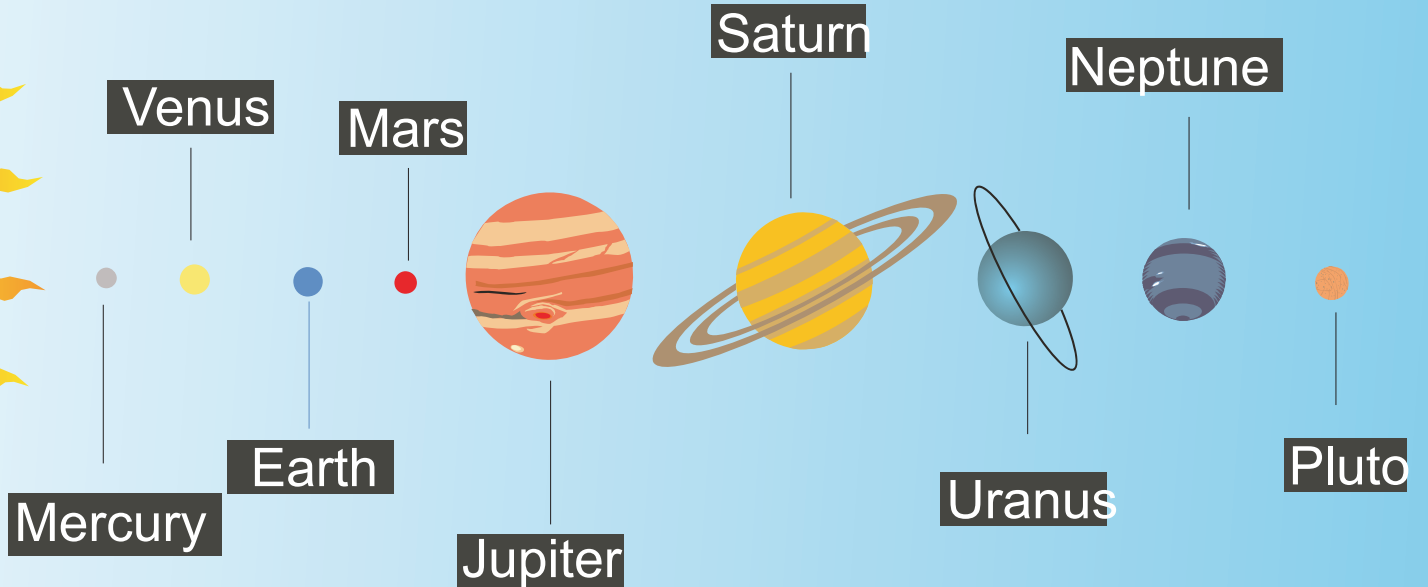

The inner planets and the outer planets are separated by the asteroid belt. The planets in our solar system are categorized as rocky planets or gas planets. The rocky planets are Mercury, Venus, Earth, Mars and Pluto. The gas planets are Jupiter, Saturn, Uranus, and Neptune.
